**Old Business:**

Committee continued to discuss the Standards for Signage, Containers, and Adequate Infrastructure (ICI) recommendation. The committee reviewed other cities programs but focused mostly on Austin Texas. Changes were made to address format and wording to ensure the document clearly defined the purpose of the document.

Other discussion centered on components of a final standard and questions that would need to be answered before such a standard could be drafted. This included who would be responsible for what in the standard, a phase in schedule to ensure education is done first, considerations on mandatory vs non-mandatory, and what recyclable materials are included and ensuring the list is flexible with market conditions.

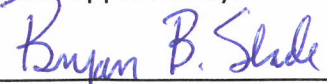

No vote on the document was taken to allow for changes to be made and brought back to the committee at the next meeting. The document remained in draft form.
